Mobile Phones and Brain Tumours

Harry Zehnirith MBBS (HON) FRACP

Have you been concerned that your child's constant use of the mobile phone will cause harm, such as a brain tumour?

The most recent research spanning 30 years, carried out in Scandinavia (home of Nokia and Ericsson), and *just* published suggests that you needn't worry:

Click [here](#) for the *Time Trends in Brain Tumor Incidence Rates in Denmark, Finland, Norway, and Sweden, 1974-2003*. abstract from the **Journal of the National Cancer institute** in December 2009.
